

# Action Assays™

Actionable Data to Drive Decisions

A **comprehensive catalog** of brightfield immunohistochemistry assays that provide actionable data to define and advance your biomarker program.

**More than 100 singleplex and multiplex assays** for standard and emerging immun-oncology targets, such as:

<b>CD3</b>	<b>CD4</b>	<b>CD8</b>	<b>CD30</b>	<b>CD68</b>
<b>FoxP3</b>	<b>OX40</b>	<b>IDO-1</b>	<b>PD-1</b>	<b>PD-L1</b>

**Contact us to discuss your specific assay needs.** Custom assay development also available.

## EXPERTISE

*Assays developed and validated by an integrated team of scientists, pathologists and tissue analysis experts who can provide additional data and insight to initial results.*

## CENTRALIZED, FULL-SERVICE LAB

*Our consolidated lab offers comprehensive assay and sample handling services, allowing us to control quality from beginning to end.*

## CHART A FUTURE PATH

*Our expertise, breadth of services and dedicated focus on individual client needs allows you to advance your assay from research to clinical trials to companion diagnostics.*
