

# ActionAnalysis™

Define Your Path to Success

**ActionAnalysis** quickly generates data for hypotheses to focus your biomarker strategy, reduce the risk of failure and accelerate drug development. Rapidly evaluate existing targets through trend analysis, tissue wide expression and relative rank ordering.

**ActionAnalysis** accelerates and simplifies your tissue image analysis needs through:

Whole slide scanning

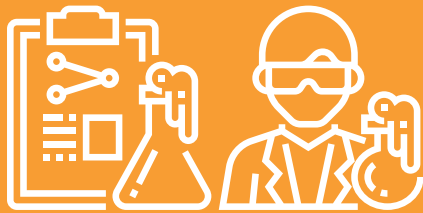

Image hosting and analysis downloads

No upfront algorithm development needed

Flagship is the most experienced, integrated clinical laboratory, offering ready-to-use and custom image analysis solutions to meet the current and future needs of drug development.

## CENTRALIZED, FULL-SERVICE LAB

*Our combined histology and image analysis laboratory offers single-point consultation and deployment.*

## CHART A FUTURE PATH

*Our integrated team of scientists, pathologists and tissue analysts will help define your path to success.*

As your project advances through the pipeline, Flagship offers the experience and expertise to facilitate critical decision points, from generating hypotheses about mechanism of action to patient selection and companion diagnostics.

## PARTNER WITH FLAGSHIP
